

Healthy Salmon Habitat Worksheet

Circle the things that make a stream habitat healthy for salmon. Cross out the things that make a habitat unhealthy.

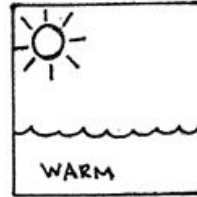

(Or, make a T-chart and organize the things into "healthy" and "unhealthy.")

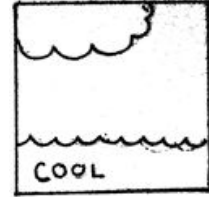

Oxygen dissolved in water

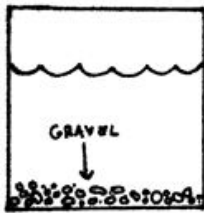

Very little oxygen in water

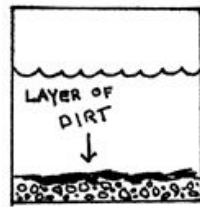

Warm water

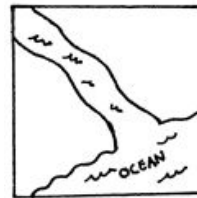

Cool water

Clean gravel

Lots of dirt and sediment in stream

Stream stays connected in summer

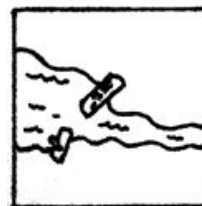

Parts of stream dry up in summer

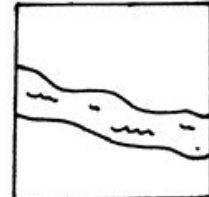

Dams blocking stream

No dams in stream

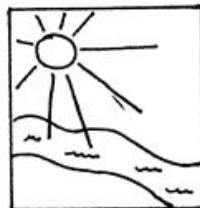

Large logs in streambed

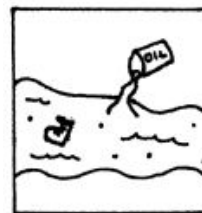

No large logs in streambed

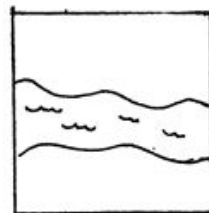

Trees and plants near stream

Stream open to sunshine

Pollution

Clean water
